

God is DNA

Divinity is rooted in microbiology. The GOD is DNA series is an unprecedented religious detective story—a modern scientific translation of ancient Gnostic secret teachings and ideas. Rogue scholar and author Paris Tosen takes one of the most controversial and revolutionary positions on the subject of pre-Christian religiosity, flying in the face of the foundation of the Christian faith and decodes the true meaning of God, as DNA. Tosen isolates example after example in scripture to substantiate his theory that divinity is rooted in microbiology. This is a work that strongly resonates with alternative thinkers and anyone who is seeking salvation from the material prison. This edition contains an extended discussion on Jesus. Not recommended for devout churchgoers.
