

Christ Among the Medieval Dominicans: Representations of Christ in the Texts and Images of the Order of Preachers (Notre Dame Conferences in Medieval Studies)

Christ among the Medieval Dominicans adopts a genuinely multi-disciplinary approach to its topic, bringing together the research of experts in a wide variety of fields. The essays in this volume provide many perspectives (theology, philosophy, spirituality, institutional and social history, art history, Latin and vernacular literature, and manuscript studies) on the life and thought of the Order of Preachers. They focus on the role of Christ within the devotion and imagination of the Order and in effect expose the state of the question in studies of this important medieval institution. The essays are accompanied by ample visual evidence from paintings, manuscript illustrations and texts, woodcuts, and engravings, complete with generous indices of manuscripts and names. This is a valuable resource for all scholars of the Middle Ages, especially those concerned with medieval religion, theology, and spirituality.
