

Management Scientist Software, Version 4.0 for Windows

Applications-oriented introduction to the role of management science in decision-making. Blends problem formulation, managerial interpretation, and math techniques with an emphasis on problem solving. Problem-scenario approach introduces quantitative procedures through situations that include both problem formulation and technique application. Extensive linear programming coverage includes problem formulation, computer solution, and practical application. The coverage also includes coverages of transportation, assignment, and the integer programming extension of linear programming, as well as advanced topics like waiting line problems, simulation, and decision analysis.

complexity of software license management with server-based, concurrent licensing Windows 10 compatibility . Securely download your version Analyst Software today!
