

# A Winners Workbook: Reproducible Activities for Children with Attention Deficit Disorder

Designed for children ages nine to thirteen, the activities in A Winners Workbook are interesting and challenging enough to keep the attention of even the most distractible student. All the exercises are reproducible so that students can place the pages in a binder to work on in clinical sessions or at home. In Part I of the program, the author describes ADD, listing ways in which it can affect a child's home life and performance at school, and suggests strategies for coping with the disorder. Part II contains activities grouped by themes. Activities range from role-playing exercises to word games to thought-provoking worksheets that encourage children to examine their attitudes and opinions about a variety of subjects. Also included are charts and graphs for students to track their improvement and checklists for daily routines.
