

Diet and Impotence: How Your Food Choices Are Either Causing or Preventing Erectile Dysfunction and Infertility (Natural Disease Prevention Book 2)

Diet and Impotence: How Your Food Choices Are Either Causing or Preventing Erectile Dysfunction and Male Infertility Today only, get this book for just \$2.99. Regularly priced at \$4.99. Read on your PC, Mac, smart phone, tablet or Kindle device. This book is designed to help you realize the common-sense connection between what you eat and your reproductive health and ability to perform sexually. Our diet has a huge impact on nearly every aspect of our life, whether we realize it or not. The true reason that we eat revolves around much more than taste and convenience; our food choices literally become our bodys molecular engineering. If we use the wrong materials to engineer and construct our incredibly complex reproductive system, then certain aspects of it will not work properly. In todays world, almost all of our education about nutrition comes from advertising. Very few people take actual courses in nutrition, but instead derive their dietary habits from the way they are raised and otherwise influenced by society, from peer pressure to advertisements. When food is created to generate profit instead of health, and then it is advertised as being healthy, the result is a very confused and malnourished population. With the growing epidemic of sexual problems among men in our modern world, it is very obvious that there is something wrong with our environment that is causing so many of these issues. The most obvious culprit would be the food that we eat, and this book will explain exactly why and how this is happening as well as how you can stop participating in it and regain your health and sexual prowess. Here Is A Preview Of What Youll Learn... What Causes Erectile Dysfunction? The Dangers of Commercial Treatments How Diet and Lifestyle Affect Impotence The Benefits of a Plant Based Diet Going Plant Based Make it Work for You Eating to Banish Impotence Transitioning to a Plant

Based Lifestyle And much more!
