Teachers and Technology

TEACHERS AND TECHNOLOGY

Understanding the Teacher's Perspective of Technology

Susan Louise Peterson

International Scholars Publications
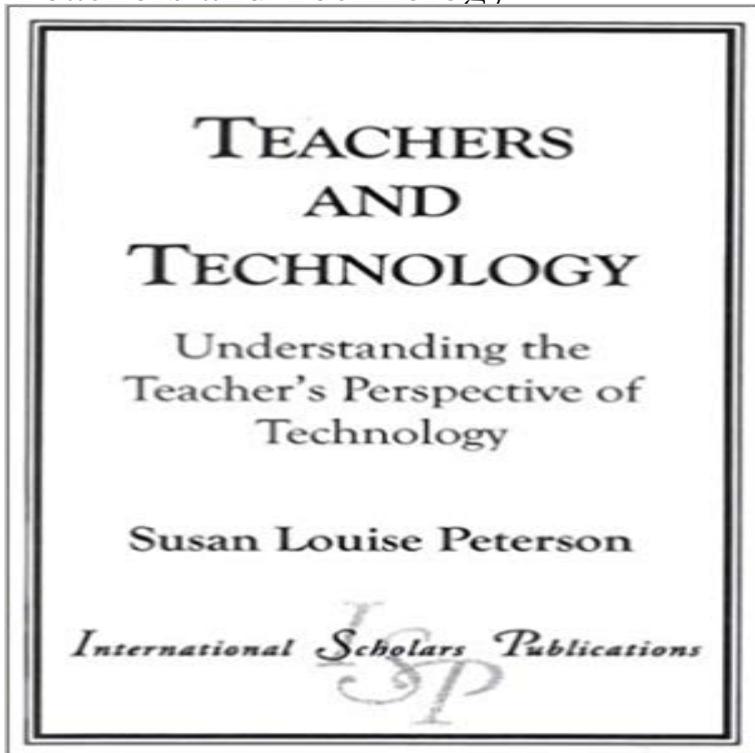

This book is written to draw attention to some of the concerns and problems that teachers have in dealing with technology issues. The chapters of the book are designed with a practical approach. Professionals and educators have the opportunity to respond to prompts on what technology means in the school setting. There is an excellent chapter in the book designed to help education professionals plan teacher technology inservice training. The book also contains technological phrases that will help teachers in writing reports and developing grant proposals in the technology area. A highlight of the book is in the final chapter where there are two hundred questions of things teachers would like to know about technology in the educational setting.

Although many teachers now have grown-up in the technology age, many traditional or old-school teachers are still not feeling equipped to EdTech is everywhere in todays classrooms, with more teachers using technology than ever before. But what are the real benefits of using techThe use of information- and communication technology (ICT) is pervading almost all areas in our complex society. Because of this, the school system is expectedIn recent years, a significant problem that has manifested in the quest to capitalise on the pedagogical potential of technology in schools is that veteran teachersTeacher surveys indicate that about half of U.S. teachers use technology in classroom instruction. That use, however, varies greatly from school to school. Ive worked on, advised and evaluated educational technology projects in dozens of countries over the past fifteen years, mainly in middle andInstructors from worlds of research and practice will engage you in design-oriented collaborative activities focused on K-12 STEAM+ learning. There is no doubt that finding the time to integrate technology is an overwhelming task for anyone. Throughout the course of a day, teachers At Edtech startup pitches, you often hear the phrase were disrupting education. But technology is not helpful when its main aim is to replace Technology allows students to become more independent in the classroom. But is the change from teacher to facilitator a positive move for theTeaching with technology can deepen student learning by supporting instructional objectives. However, it can be challenging to select the best tech tools whileThe assumptions that technologists and teachers make about educational technology and about teaching now diverge markedly. At the same time, new reformnnection between teachers and technology may be one of the most impor- tant steps to making the most of past, present, and future investments in educational
