

Guidelines for Transgender Care

Get the tools to effectively meet the needs of transgender people in your community. *Guidelines for Transgender Care* is a one-of-a-kind guidebook for training practitioners to meet the healthcare and social services needs of transgender people in their community. Based on a collaboration between community-based health professionals in British Columbia and international experts in transgender health, these guidelines address both the transition-related needs of transsexuals and also the broader health issues of crossdressers, drag kings/queens, androgynous individuals, Two Spirit individuals, and people who are bi- or multi-gendered. This practical handbook is an essential resource for community-based family physicians, nurses, social workers, counselors, speech therapists, and other clinicians with an interest in transgender care. Improving transgender individuals access to health and social services takes not only awareness of and sensitivity to transgender health concerns but also clinical competency. *Guidelines for Transgender Care* explains a wide range of clinical issues practitioners need to consider when providing health and social services for transgender individuals, and suggests evidence-based best practice guidelines relating to primary medical care, mental health care, care of transgender adolescents, hormone therapy, sex reassignment surgery, speech/voice change, and social and medical advocacy. Frameworks for comprehensive training of community-based professionals is also discussed. Each chapter is extensively referenced. Topics in *Guidelines for Transgender Care* discussed include: primary medical care counseling clinical management of gender dysphoria ethics, the law, and psychosocial issues endocrine therapy sex reassignment surgery (SRS) transgender speech feminization and masculinization case advocacy training

community-based clinicians Guidelines for Transgender Care is crucial, insightful information for health practitioners of all types, social workers, educators, and students.

Terminology and definitions. A detailed discussion of terminology in the context of the great diversity of transgender and gender nonconforming people Guidelines for Transgender Care: 9780789036117: Medicine & Health Science Books @ . Transgender people may avoid seeking care due to prior discrimination or disrespect in a clinic setting.[1,2] Providing a safe, welcoming and culturally Transgender people may seek any one of a number of gender affirming interventions, including hormone therapy, surgery, facial hair removal, interventions for Center of Excellence for Transgender Health, Department of Family and Community Medicine, University of California San Francisco. Guidelines for the Primary and psychologists lack of familiarity with trans-affirmative care led the APA Task Force to recommend that psycho- logical practice guidelines be developed to These guidelines expand on the original UCSF Primary Care Protocol for Transgender Care, which since its launch in 2011 has served thousands of providers Objective: The aim was to formulate practice guidelines for endocrine for Transgender Health commented on preliminary drafts of these guidelines. treatment and participate in ongoing care throughout the endocrine transition and Trans Care BC Primary Care Toolkit ii.
