

# On The Other Side Of Life: Exploring the Phenomenon of the Near-Death Experience

According to researchers in the field, over 8 million Americans have undergone a near-death experience (NDE). Ms. Valarino, an expert in NDE history, presents this phenomenon in a probing multidisciplinary examination: a dialogue with distinguished investigators and scholars in the fields of psychology, biology, physics, neurophysiology, theology, and philosophy to explore different understandings of the NDE. These six eminent personnel propose original and scientifically stimulating hypotheses on the NDE phenomenon: Professor Kenneth Ring, a world-renowned psychologist, presents a vast survey of the latest research; Professor Michel Lefeuvre, a philosopher, provides the first extensive philosophical analysis of the NDE phenomenon; Professors Louis-Marie Vincent, a biologist, Regis Duthiel, a theoretical physicist, and Paul Chauchard, a neurophysiologist, put forth highly interesting theories with respect to their scientific fields of expertise; and, Lord Bishop Jean Vernet, delegate of the French Episcopate and advisor to the Vatican, puts forth the views of the Catholic Church. *On the Other Side of Life* is an unbiased exchange of ideas and knowledge on the near-death experience. Ms. Valarino infuses this book with disarming intellectual honesty, leaving a lasting impression on anyone willing to open up to this fascinating phenomenon as well as professionals in the areas of psychology, philosophy, neuroscience, and theology.
