

Peacekeepers at War: Beirut 1983— - The Marine Commander Tells His Story

On October 23, 1983, nearly simultaneous suicide truck bombings killed 241 U.S. peacekeepers in their barracks at the Beirut International Airport (BIA) and 58 French paratroopers at their headquarters two miles north of BIA. In this long-awaited book, the Marine Corps commander of the U.S. Multi-National Peacekeeping Force that was destroyed by terrorists in Lebanon tells his story for the first time. Together, these suicide bombings comprised the largest nonnuclear explosion ever recorded and are now recognized as a seminal event leading to the current war on terrorism. Such acts of war revealed a new, highly effective tactic, which complemented the terrorists strategic goalsthe withdrawal of the peacekeepers and Western influence from Lebanon and a change in U.S. policy. Peacekeepers at War lays out, in detail, a sequence of events leading up to the suicide truck bombings from which one can extrapolate the rationale, motives, and perpetrators behind it. Geraghty argues that the absence of any retribution against the perpetrators emboldened the terrorists to assume they could attack Americans and Western interests with impunity. This led to kidnappings, torture, and the murders of Americans and other Westerners. Peacekeepers at War will be of interest to general readers who want to learn more about this seminal event and its effects on the current global war on terrorism.
