

# Sundt's Occlusive Cerebrovascular Disease, 2e

This revised edition provides a concise yet comprehensive presentation of extracranial occlusive vascular disease. Contains new chapters on carotid endarterectomy in patients with contralateral carotid occlusion, carotid endarterectomy in elderly patients, moyamoya disease, and heparin-induced thrombocytopenia and hypercoagulability in ischemic stroke. This text features detailed illustrations of the surgical anatomy and approaches, and also provides a clinical and diagnostic evaluation.
