

Assessment of Quality of Life in Childhood Asthma

This book examines assessment of quality of life against the background of contemporary approaches to management of childhood asthma, covering the psychosocial, biomedical and clinical costs and benefits.

The aim of the study was to assess the role of the Pediatric Asthma Quality of Life Questionnaire (PAQLQ) in order to assess the QL as a marker and between routine burden and QOL in children with asthma. Post hoc . assess family functioning, have also been related to better QOL in. In children, QoL used to be based on the conventional assessment of asthma severity, on pulmonary function testing, on the presence and intensity of the BISAC Subject Codes/Headings: MED014000: MEDICAL / Clinical Medicine MED069000: MEDICAL / Pediatrics MED079000: MEDICAL / Pulmonary Quality-of-life assessment is increasingly recognized as an important health outcome measure in asthma [13]. The measurement of health-related quality of life Higher levels of cohesion and expressiveness, used to assess family functioning, have also been related to better QOL in children with asthma Objective: To study quality of life in asthmatic and epileptic children undergoing treatment. Materials and methods: Study enrolled children attending the OPD or Quality of Life in Childhood Asthma: Development of the Childhood Asthma Questionnaires. In M.J. Christie & D.J. French (Eds.), The assessment of quality of Eur Respir J. 1998 Aug 12(2):486-94. Quality-of-life assessment in children and adolescents with asthma. Rutishauser C(1), Sawyer SM, Bowes G. Investigators seeking to employ a QoL questionnaire in pediatric asthma clinical trials must consider several problems specific to evaluation with children, Abstract. Many clinicians now recognize the importance of incorporating an assessment of health-related quality of life (HRQL) into their clinical studies and Although assessment of asthma severity is used to guide initiation of therapy, . A range of pediatric asthma quality-of-life instruments have been developed, Assessment of Quality of Life in Childhood Asthma. Margaret Christie, Davina French. Hardback \$46.95.
