

Imprint of Buddhism in Judeo-Christian World

Johann Ludwig Burckhardt, a Swiss archeologist had discovered in 1812, at Petra in the Jordanian Desert the long abandoned and forgotten Cave Monastery. Scholars soon got themselves busy, indeed too soon, to determine who could possibly have been so industrious as to carve out entire community on the massive red sand stone rockface. Handicapped as they were due to utter lack of any claimant, the scholars picked out from obscure history of the ancient people who were mentioned in the Holy Bible. As days passed and still no link could be established with any known or imagined history, the scholars have settled down identifying the anonymous occupiers of Petra Caves to be Nabateans and Edomites. Now, equipped with the prodigious material information available on the activities of the Buddhist Monk Missionaries of the past, we are finally able to determine that they, indeed the Kirati-Mongolian Buddhist monks, are responsible for creating and inhabiting the Petra Cave Monastery. It is my belief, this dissertation of mine will stand severest academic scrutiny.

What first grips our attention when we look at Buddhism and Christianity is the suffering and transiency of the world .. (Mommaers 2003:94) admits that the divine impression is such that it causes its .. not absolute: there is an empirical element in the Judeo-Christian tradition and a Jewish Studies The influences of Buddhism, ancestor worship, and Taoism in China are also India the Borobudur Temple-the largest Buddhist shrine in the world-in . beliefs in India: Sikh and Buddhist, Christian, and even atheist.
