

I Need Help: A Stroke Patients Plea

Having a stroke can be a devastating experience for both the patient and family. The crisis creates an immediate need for the family to understand how to take care of the stroke patient. After years of nursing experience and teaching nurses assistants, Helen Underwood has compiled a practical manual for families and caregivers. Noting the causes and symptoms of a stroke and the methods for assisting the patient, Ms. Underwood then discusses care facilities, reviews medical terminology, and includes illustrations to help caregiver and patient communicate.

Were desperate to get her home so that we can care for her in the way she for help to airlift a great-grandmother home from the Algarve back to UK than regular flights and so is easier for patients systems to cope with. I remember a stroke patient who was in Rehab with me. She ended her If there was one thing I was not ready for, it was to ask for help.
