

The Monks of the West

An indispensable reference for the history of monasticism in the western world, Montalembert's seven-volume masterpiece on the subject still reads with depth and conviction. Covering the monastic movement from its precursors to the period of the Venerable Bede, this set contains substantial information on a number of western saints.

One of the writers responsible for reviving hagiography, Montalembert's magnum opus was his seven-volume detailed study of the monks of the western church.
