

The Value of Escharotics or Medicines Which Will Destroy Any Living or Fungus Tissue in the Treatment of Cancer, Lupus, Chronic Ulcers and Tumors

8vo, embossed leatherette covers. 256 pp. The Nichols Sanatorium had treated 3300 patients up to 1918, and by 1956 the list had grown to 70,000. Many medical doctors did not recognize the Sanatorium as a valid medical institution, but the thousands of people who came to Savannah as a last resort and almost without hope, and who left after treatment to live for many years in comfort, seemed to be sufficient proof that this place did relieve suffering and that it added years to the lives of those who were treated. Dr. Nichols died in September 1925 and the Sanatorium passed into the hands of his daughter. This memorial to his work is notable for the quality of the Roycrofts production and binding.
