

You'll Never Meet A Bald Eskimo - How Indigenous People Hold The Key To Preventing & Reversing Hair Loss

You'll Never Meet A Bald Eskimo - How Indigenous People Hold The Key To Preventing & Reversing Hair Loss Its now clear that male pattern baldness is a fairly modern phenomenon which doesnt occur in Indigenous populations. After years of research combined with trial and error the distinguishing factors of modern life which trigger our genetic predisposition for hair loss have been boiled down and compiled in our book. The key is that simple changes can make a huge difference and the results are evident within months or even weeks.
